TO THE BEAUTY FROM THE WISDOM

About the works of Sohrab Zafari

The works by Sohrab Zafari are in a such precise way that I was proud of signing them.

ESSENTIALITY

His work is an essential work. Far from a fashionable minimalism, stupid name to cover some insipid architectures, the Zafari proposals are full of flavour, and richness and beauty.

PRECISION

The spaces and projects by Zafari are absolutely precise. From his fascinating project Haus am Hang to his Experimental H., his key question is to be very precise.

LIGHT

All of his work is very luminous. Not only his magnificent and sharp apartment in Heidelberg or his delicate Quartero Shop but also his furniture has the light in their ideas and in their forms.

My attempt in Architecture is to dominate Gravity trough clear frames capable to establish the order of the space. And to enlighten my spaces using the natural light, the richest material given free for us. And building in any case IDEAS, materializing ideas capable to convoke the Beauty from the wisdom. And Sohrab Zafari did it! A true Architect.
